REVISIT

Act it Out: The revisits in Phase 6 will review the grammar terminology needed for the lesson, ensuring the child understands the types of words being altered by the focus prefix or suffix. As this lesson uses **verbs**, the revisit activity will review what a verb is. (If they have not yet learnt about verbs, use this as a teaching opportunity.) Since a verb is an action or doing word, take the flashcards and call out the different verbs for the child to demonstrate—for example: jump, dance, eat. Flip the card to reveal the answer.

Note: While this lesson focuses on verbs, it does not use verbs exclusively.

Phase 6.1

+un Prefix

Suggested Toolbox Items:

bag

dice

playing pieces

SENTENCES

Time to sit and focus! Today's sentence activity involves both **reading** and **writing** within the same task.

The child will read each sentence and change the word highlighted in **bold** to its opposite by adding the prefix '**un**' at the beginning. Reiterate that the word in bold is the **root word**, and '**un**' is the **prefix**.

Make sure today's prefix is clearly displayed for the child to refer to.

TEACH PREFIX

This lesson introduces the concept of a prefix to the child for the first time. Begin by showing them the prefix '**un**' and explain that a prefix is different from a grapheme. A prefix is a group of letters—in this case, '**un**'—added to the beginning of a word to change its meaning. Provide an example: show a picture of someone who is happy and write the root word 'happy'. Then, show a picture of someone who is unhappy and explain that when we add the prefix 'un' to the word 'happy', it becomes 'unhappy'. The prefix 'un' changes the meaning of the word to 'not' or 'the opposite of'. Highlight that '**happy**' is the **root word** and '**un**' is the **prefix** that changes its meaning. Explore more examples by playing a memory game of 'pairs' where you and the child take turns turning over cards to find matches, such as 'pack' and 'unpack'. Each time, reiterate what the root word is and how the 'un' prefix changes it to mean 'not' or 'the opposite of'.

READ WORDS

Mime Time: This game focuses on reading words with the '**un**' prefix while recognising that these words mean '**the opposite of** the **root word**'. To play, place word cards into a gift bag or box. Take turns with the child to secretly choose a word card from the bag, look at it, and place it face down. Then, act out the word using only mime actions (no talking) while the other person tries to guess it. After each round, reiterate the root word and explain how the '**un**' prefix changes its meaning to 'not' or 'the opposite of'.

SPELL WORDS

Board Game: During this activity, the child will learn to simply add the prefix '**un**' to the beginning of a **root word** to spell it, highlighting just how easy it is. To play, print a copy of the game, a record sheet for both you and the child, and gather some counters and a die. The board game has different root words (typically verbs) on the landing squares. Every time you or the child lands on a square, you must change the root word to its opposite by adding the '**un**' prefix and record it on your record sheet. Continue around the board until all words have been claimed, with the winner being the player with the most words. To help vary the number of words claimed per player, a word cannot be claimed twice; rolling a '3' means 'miss a turn', and rolling a '6' means 'take another turn'.
